MEKİK HALI İPEK®

USER MANUEL

1. Regular cleaning is a must for carpets. This is not done by pressing the dust settles into the carpet

2. Carpet cleaning that should not be whipped, beaten, if possible, should not be cleaned daily with a vacuum cleaner

3. Carpets should not be washed. Carpets should be cleaned using a shampoo. In accordance with the instructions absolutely must be cleaned with just shampoo foam

4. After cleaning, the carpet should be dried in a short time should never be left damp. Drying should be done under the sun. If the carpet is wet moldy studies can be welded deformed left malaria.

5. The carpet cleaning, hard surface cleaners, bleach, should be kept away from substances such as hydrochloric acid. For general cleaning, carpet shampoo will suffice. Cleaning agents used in the wrong color as the carpet leads to differences in damage and discolouration

6. Hard objects and items must not be placed on the same place for a long time.

7. Regardless of carpet face yarn type and water at 50 ° C on tea, iron and so on. Do not contact any of the material

8. Liquid spilled on the carpet immediately absorbent cloth, paper towel and be absorbed by the vacuum cleaner and carpet stain removal process as our instructions should be carried out according to the type of spilled material

9. Experts should be consulted for spots formed on the carpet carpet cleaner.

10 Carpeted floors manner not in use cases should be kept in a place with no moisture should be placed vertically on a roll and putting nothing. There is no need to put mothballs between the carpet you use the opportunity to open within a few months

11 Do not scratch the surface of the carpet with a frequency of 500,000 or more with a pointed tip and sharp objects. Because lying flat on the ends with strain between the pile, due to frequent carpet pile will not be able correct themselves. This will cause deformation of the carpet pile once

12 Carpets should not be left in direct sunlight for a long time

13 Carpet beneath the weight, when asked to pull off, removed the overlook and back mesh should be careful not to tear

14 Carpets of hard and sharp objects should be careful not to damage during transport

15 Use density and intensity of use in the carpet surface so that it is inevitable that differences between regions where less. You need to change the direction of the carpet at regular intervals to prevent it; thus prevents the production of non-welded shadows

16 Produced staple fiber (wool and acrylic) an amount of hair loss in the carpet swept the carpet with a powerful vacuum cleaner on a regular basis, though inevitably it will be reduced to almost nothing in a short time

17 Footprints seen in the cut-end carpet. This is proportional to the brightness of the yarn used in the manufacture of carpets. That's why this particular type of carpet to use a lot of intensity, which should be considered when

18 When you put away again from the same whether used carpet will occur before the absolute difference between the two carpets. While the second carpet, this should be taken into account

19 Polypropylene in the carpet, because of the fibers used in making carpets feature easy and as soon as felting, deformed etc. such adverse events may occur. These carpets are used where there is less necessity of retrieving the intensity of use should be considered

20 Open floor carpet show dirt more easily and more difficult to clean. Carpet selection to determine the background color according to the situation of the place will be used when it will be useful for further ease of use

21 All stains without damaging any stain remover stain Please note that goods can not never completely remove

22 Leather carpets may be differences in color within the same group of products to be produced from natural materials. Is identical in size due to the natural material is not said standard production. There may be differences between carpets from the same group

HOW TO REMOVE STAİND

1 Stains should be immediate intervention occurs soon. Otherwise, it can be difficult to remove stains or may never be possible.

2 Stain removing the purposes of substances that can cause stains, remove it from a chemical process should be exercised on the carpet. Possible should be absorbed from the stain on the carpet before the application of any chemical substance on the carpet.

3 Rub it against the stain is not true, it would lead to permeate into the carpet stains.

4. If you try to remove stains with carpet shampoo, you must use only the foam shampoo. If you use a shampoo or water, you may cause a dirty image.

5. In the pile of the carpet and permanent tissue damage should be done to avoid cleaning with chemicals, such as bleach, only recommended carpet cleaning products should be used.

6. To distribute the stain on the carpet stains need to clean the outside to the center.

7. After cleaning, dry spots may become visible again on the carpet. Why, from the rope along with the correct stroke and institution of the pile bottom, which can be dry during the dissolution of the stain to dry towards the pile of stain reappears. Therefore, you may need to practice a few times the stain removal process.

8. Fancy yarn produced in our product "User's Guide" included in the inventory is not valid.
